

## PRODUCT DATA SHEET

# EVERBUILD® 502 Weatherproof Wood Adhesive

A HIGH QUALITY, D3, RESIN BASED WOOD ADHESIVE.

### PRODUCT DESCRIPTION

Can be used internally and externally and provides a high strength, impact resistance bond that is usually stronger than the wood itself. Ideal for all general woodworking and joinery uses, furniture assembly and household DIY use. Dries clear. Fast cure, initial set in just 10 minutes.

### USES

As a weatherproof/creep resistant wood adhesive, internally and externally.

### CHARACTERISTICS / ADVANTAGES

- Excellent rate of bond strength development.
- High degree of water resistance. D3 Classification-joints may be subject to short term water contact or exposure to high humidity.
- Interior/exterior use.
- Low timber staining characteristics - will not stain.
- Creep Resistant - Conforms to EN14256 Resistance to static load.
- Dries clear - contains no inert fillers.
- Water based - environmentally friendly/easy clean up.
- Suitable for radio frequency cure.

### PRODUCT INFORMATION

<b>Packaging</b>	various
<b>Colour</b>	Dries clear
<b>Shelf Life</b>	12 months

### Specific Data

Viscosity @ 23°C	7000-15000 cP
Brookfield RTV 5/20	
pH	2.0-4.0

PRODUCT	EN204 D3/3	BSEN 14256
Everbuild A/P Wood Adhesive	Ave 2.17 N/mm <sup>2</sup>	19.2 days
Specification	≥2.0 N/mm <sup>2</sup>	≥ 14 days

### APPROVALS / STANDARDS

BS EN204 D3  
BS 14256

## Storage Conditions

To ensure safe storage of EVERBUILD® 502 Weatherproof Wood Adhesive, containers should be well sealed to prevent evaporation of water and the formation of skin on the surface. The emulsion must be stored at a temperature above freezing. A temperature of 5-25°C for not more than six months is recommended. Higher temperatures will affect quality and cause the formation of crusts and skins, especially if the containers are not tightly closed or subjected to direct sunlight for long periods. During storage, slight separation may occur. (thin layer above thicker layer). This is an esthetic rather than technical problem. In this case, shake well before applying. If these conditions cannot be met, please refer to our Technical Service Department who will advise on storage stability.

Density	1.0-1.2 g/cm <sup>3</sup>
Solid content by weight	46-49%
Thermal Resistance	Stable (4 week @ 50°C)

## APPLICATION INSTRUCTIONS

Apply adhesive thinly to both surfaces. Do not over apply as this will slow down cure. Clamp surfaces together until adhesive dries (off in 1-2 hours: full strength 8 hours). Support until fully cured (8 hours at 20°C). When fitting dowels, the adhesive should be applied to the holes.

- Suitable for radio frequency curing.

### SUBSTRATE PREPARATION

All surfaces must be clean, dry and free from grease.

## LIMITATIONS

- Not suitable for continuous immersion in water.
- Ensure wood doesn't contain excessive moisture (<15%).
- Do not use at temperatures below 10°C.
- Note: drying time is extended at low temperatures.
- Clean excess adhesive off glue line after clamping before adhesive dries with a damp cloth.
- Sand off any excess adhesive before staining the wood.
- Ensure sufficient clamping pressure, especially important with radio frequency bonding.
- Use on Laminates: Only suitable for bonding small porous laminate strips. Do not use on non-porous or large areas of laminate. Use CONTACT ADHESIVE.
- EXTERIOR USE: All glue joints must be protected with impervious paint system when dry.

## VALUE BASE

All technical data stated in this Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

## LOCAL RESTRICTIONS

Note that as a result of specific local regulations the declared data and recommended uses for this product may vary from country to country. Consult the local Product Data Sheet for the exact product data and uses.
