

PRODUCT DATA SHEET

Sikadur®-300

2-COMPONENT EPOXY IMPREGNATION RESIN

PRODUCT DESCRIPTION

Sikadur®-300 is a 2-component, epoxy based impregnating resin.

USES

Sikadur®-300 may only be used by experienced professionals.

Sikadur®-300 is used as

- Impregnating resin for SikaWrap® fabric reinforcement for the wet application method
- Primer resin for the wet application system

CHARACTERISTICS / ADVANTAGES

- Easy mix and application by trowel and impregnation roller
- Manufactured for manual or mechanical saturation methods
- Good adhesion to many substrates
- High mechanical properties
- Extra-long pot life

APPROVALS / STANDARDS

 Adhesive for structural bonding tested according to EN 1504-4, provided with the CE-mark

PRODUCT INFORMATION

Chemical Base	Epoxy resin				
Packaging	Component A:	22.305 kg			
	Component B:	7.695 kg pails			
Colour	Component A: light-yellow to amber liquid Component B: pale yellow to clear liquid				
	Components A + B mixed: light-yellow to clear liquid				
Shelf Life	24 months from date of production				
Storage Conditions	Store in original, unopened, sealed and undamaged packaging in dry conditions at temperatures between +5 °C and +30 °C. Protect from direct sunlight.				
Density	1.16 kg/l (component A+B mixed) (at +23 °C)				
Viscosity	Shear rate: 50 /s				
	Temperature	Viscosity			
	+15 °C	~2,000 mPas			
	+23 °C	~700 mPas			
	+40 °C	~200 mPas			

Product Data Sheet Sikadur®-300 May 2017, Version 02.01 020206040010000006

TECHNICAL INFORMATION

Flexural E-Modulus	~ 2,800 N/mm² (7 days at +23 °C)			(DIN EN 1465)	
Tensile Strength	~ 45 N/mm² (7 days at +23°C)			(ISO 527)	
Tensile Modulus of Elasticity	~ 3,500 N/mm² (7 days at +23 °C)			(ISO 527)	
Elongation at Break	1.5 % (7 days at +23 °C)			(ISO 527)	
Tensile Adhesion Strength	Concrete fracture (> 4 N/mm²) on sandblasted substrate			(EN ISO 4624)	
Coefficient of Thermal Expansion	6.0 x 10 ⁻⁵ per °C (Temperature range −20 °C − +40 °C)			(EN 1770)	
Glass Transition Temperature	Curing time	Curing temperat- ure	TG	(EN 12614)	
	30 days	+30 °C	+53 °C		
Heat Deflection Temperature	Curing time	Curing temperat- ure	HDT	(ASTM D 648)	
	7 days	+15 °C	+43 °C		
	7 days	+23 °C	+49 °C		
	3 days	+40 °C	+60 °C		
	7 days	<u>+40 °C</u>	+66 °C		
	Resistant to co	ntinuous exposure +4	5 °C.		
Service Temperature	-40 °C to +45 °C				
System Structure	Substrate primer - Sikadur®-330 / Sikadur®-300. Impregnating/laminating resin - Sikadur®-300. Structural strengthening fabric - SikaWrap® type to suit requirements.				
APPLICATION INFORMATI	ON				
Mixing Ratio	Component A: component B = 100: 34.5 by weight When using bulk material the exact mixing ratio must be safeguarded by accurately weighing and dosing each component.				
Consumption	Guide: 0.4–1.0 kg/m² dependant on fabric type.				
Ambient Air Temperature	+15 °C min. / +40 °C max.				
Dew Point	Beware of condensation. Substrate temperature during application must be at least 3 °C above dew point.				
Substrate Temperature	+15 °C min. / +40 °C max.				
Substrate Moisture Content	< 4 % pbw				
Pot Life	Temperature +15 °C +23 °C	Potlife ~6 hours ~4 hours	Open time ~3 hours	(EN ISO 9514)	
	+40 °C	~90 minutes	~60 minutes		
	low temperatures. The high temperatures, the	en the resin and hardener are r e greater the quantity mixed, tl e mixed adhesive may be divid g them (not below +5°C).	mixed. It is shorter at high tem ne shorter the potlife. To obta	in longer workability at	

APPLICATION INSTRUCTIONS

SUBSTRATE QUALITY

The substrate must be sound and of sufficient tensile strength to provide a minimum pull off strength of 1.0 N/mm² or as per the requirements of the design specification.

SUBSTRATE PREPARATION

Also refer to "Technical Information Manual for SikaWrap® wet/dry application method" Ref 850 41 03 and the "Technical Information Manual for SikaWrap® saturator machine wet application" Ref 850 41 04.

MIXING

Pre-batched units:

Mix components A+B together for at least 3 minutes at low speed. Avoid aeration while mixing. Then, pour the whole mix into a clean container and stir again for approx. 1 more minute at low speed to keep air entrapment at a minimum.

Bulk packing, not pre-batched:

Add the components in the correct proportions into a suitable mixing pail and stir correctly using an electric low speed mixer as above for pre-batched units.

APPLICATION METHOD / TOOLS

Refer to "Technical Information Manual for SikaWrap® wet/dry application method" Ref 850 41 03 and the "Technical Information Manual for SikaWrap® saturator machine wet application" Ref 850 41 04.

CLEANING OF TOOLS

Clean all equipment immediately with Sika® Thinner C. Cured material can only be removed mechanically.

LIMITATIONS

This product may only be used by experienced professionals.

Sikadur®-300 must be protected from rain for at least 24 hours after application. Ensure placement of fabric and laminating with roller takes place within open time

For application in cold or hot conditions, pre-condition material for 24 hours in temperature controlled storage facilities to improve mixing, application and not life limits

For further information on over coating, number of layers or creep, please consult a structural engineer for calculations and see also the "Method Statement for SikaWrap® manual wet application" Ref 850 41 03 and the "Method Statement for SikaWrap® saturator machine wet application" Ref 850 41 04.

Sikadur® resins are formulated to have low creep under permanent loading. However due to the creep behaviour of all polymer materials under load, the long term structural design load must account for creep. Generally the long term structural design load must be lower than 20-25% of the failure load. Please consult a

structural engineer for load calculations for your specific application.

VALUE BASE

All technical data stated in this Product Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

LOCAL RESTRICTIONS

Please note that as a result of specific local regulations the performance of this product may vary from country to country. Please consult the local Product Data Sheet for the exact description of the application fields.

ECOLOGY, HEALTH AND SAFETY

For information and advice on the safe handling, storage and disposal of chemical products, users shall refer to the most recent Safety Data Sheet (SDS) containing physical, ecological, toxicological and other safety-related data.

LEGAL NOTES

The information, and, in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product's suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request.
