

SIKA AT WORK

ALAN HOWARD HAIR AND BEAUTY, MANCHESTER

FLOORING: Sikafloor®-161 and Sika® Comfortfloor®

BUILDING TRUST

ALAN HOWARD HAIR AND BEAUTY, MANCHESTER

SIKA PULLED OUT ALL THE STOPS when providing a robust and impressive flooring solution for a hair and beauty wholesaler in Greater Manchester. [Alan Howard Hair and Beauty Supplies](#), in Stockport, required easy-to-maintain and aesthetically pleasing flooring for its 750m² trade supply warehouse.

Specialist installers, Warrington-based [Quest Industrial Flooring](#), turned to Sika to provide the ideal solution which began with Sikafloor®-161 – an economic, two-part low viscosity epoxy resin primer for the concrete substrate, offering easy application and short wait times.

ALAN HOWARD HAIR AND BEAUTY MANCHESTER

[Sikafloor®-161](#) also provided an integral Damp Proof Membrane (DPM) to prevent moisture from passing into the open interior warehouse space.

[Sika® Comfortfloor®](#) – sometimes described as ‘liquid applied vinyl’, given the polyurethane resin flooring is seamless – was then applied. Specified in pure white with a smooth finish, Sika® Comfortfloor® suited the end clients’ requirements to impress customers with the clean bright finish whilst remaining hard wearing – perfect for the high-usage warehouse space.

Sika® Comfortfloor® also provides a softer resistance to other traditional flooring, as well as acoustic design to the highest of standards.

Mark Bushell, National Sales Manager Flooring and Refurbishment at Sika, said: “The client wanted to ‘wow’ customers, but also provide a durable and safe flooring solution.

“Sika Comfort Floor ticks all the boxes for robustness, reliability and low maintenance – and with its wide range of colours, the choice of innovative design.”

Jonathan Littler, Sales Director at Alan Howard Hair and Beauty Supplies added: “We are thrilled with the end result – the seamless solution is great and the white finish is very striking.

“The on-site support from Sika and stock supply was extremely impressive.”
