

SikaGard®-6650

Sprayable anti-stone chip coating

Technical Product Data

Chemical base		water based rubber
Colour		Grey, white, black
Cure mechanism		Air-drying/cross linking
Density (liquid) ISO 12185		1,40 kg/l approx.
Solid content ISO 3251		70 % approx.
Viscosity (Brookfield) ¹		112 Pa.s approx.
Application temperature		+20°C - +30 °C
Dry after ¹⁾	at norm climate ² at 60°C	120 Min. approx. 20 Min approx.
Cure time	at norm climate ²	7 days approx.
Service temperature		-25°C - +120°C
Shelf life (storage below +10° and +30°C)		12 months

¹⁾ 23°C / 50% r.h. (layer thickness 500 µm)

Description

SikaGard®-6650 water based Anti Stone Chip Coating is environmental friendly and has a low VOC content. Developed to enable most manufacturers' stone chip finishes to be reproduced in the body shop. Manufactured in accordance with ISO 9001 / 14001 quality assurance system and the responsible care program.

Product Benefits

- low VOC
- overpaintable
- no overspray
- different textures possible by spray technique
- remains flexible when dry
- can be used wherever stone chip protection is needed

Areas of Application

SikaGard®-6650 is used to protect vulnerable, painted parts of the vehicle such as sills, wings, wheel arches and valances and shows good adhesion on 2C-acryl-basecoat- and waterbased systems. A test with the actual substrate prior the application is required. This product is to be used by professional experienced users only.

Industry

Chemical Resistance

SikaGard®-6650 is resistant against water, seawater, salt spray, oil, soft bases and acids. The above information is offered for general guidance only. Advice on specific applications will be given on request.

Method of Application

Surface preparation
Surfaces must be clean, dry rust-, dust- and grease free. Advice on specific applications is available from the Technical Service Department of Sika Industry.

Application

SikaGard®-6650 can be applied by light airless spray equipment or by means of an air-mix pistol with an air pressure of 3-6 bar.

Shake can before use.
Spray at room temperature and from a distance of approximately 30 cm in a cross motion. Spray a continuous coat. Apply this product until the desired layer thickness is reached. If a thicker layer is required, it is recommended to let the layers dry in between.

Removal

Fresh SikaGard®-6650 must be immediately removed with hot water. Once dried, the material can only be removed mechanically. Hands and exposed skin should be washed immediately using Sika® Hand cleaning towel or a suitable industrial hand cleaner and water. Do not use solvents!

Overpainting

After drying, SikaGard®-6650 is overpaintable with most commonly used conventional and water-based paint systems. It can be mixed with water-based lacquers up to 30%. Due to the wide range of paints available on the market a paint adhesion test is always recommended.
