

WE
ARE
HEALTHCARE

With over 100 years of experience, Sika has a long track record of success as a complete system and problem solution provider on many different healthcare facility projects all around the world. With extensive technical expertise and solid practical experience on every continent and in all types of climate and environment, Sika is a highly qualified and reliable partner for all of your projects.

Sika is the global technology and market leader in specialist chemicals for building and construction, providing products and complete system solutions for architectural and structural concrete, structural waterproofing, steel corrosion and fire protection, roof waterproofing, structural glazing, flooring and wall finishes, sealing and bonding, damping and reinforcing, plus so much more.

100
YEARS OF
EXPERIENCE

DEDICATED SUPPORT

Sika has created a **Major Project Management Team**, dedicated to offering a customised service for large scale projects, such as healthcare facilities, where there are many facets to the design.

Bringing together experts from key areas of its business, the team simplifies the process for customers, offering one point of contact and saving valuable time and resources for you and your clients. Each customer is assigned an individual contact who will manage the project from inception, coordinating our product offerings from roof to basement.

Sika offers one of the industry's widest product ranges for waterproofing, roofing, flooring, concrete, sealing and hygienic wall coatings. The Major Project Management Team has the breadth of experience to manage every aspect of your project, ensuring you get the best solution for all of your project needs.

DEDICATED SERVICE

FROM BASEMENT TO ROOF

SIKA, YOUR IDEAL PARTNER

CONSTRUCTION SOLUTIONS FOR HEALTHCARE FACILITIES

When designing and building healthcare facilities, not only is there the need to satisfy necessary building performance requirement, but the process should aim to reduce the facility operating costs. With more than 100 years of experience, Sika's solutions provide a single source for fully integrated and compatible products and system solutions for healthcare facilities.

These capabilities can help you address many important issues in both new construction and refurbishment projects, and can also combine to help the business run efficiently and maximise the return on investment. Sika solutions are designed and proven to be energy-efficient, highly reliable and sustainable.

SIKA SUPPORT AND GUARANTEES

Sika offers a range of support services from design support, specification writing, detail drawings, as well as performance feasibility studies and sustainability analysis from the onset, right through every aspect of the build, including detailed quality control, to the project's completion and final handover.

Typical support services from Sika may include:

- Single point of contact for all major projects
- Bespoke value engineered solutions at design stage
- Detail drawing concept assistance
- Performance feasibility
- BIM support
- Application training and on-site support
- Defined quality control procedures from production to installation
- Life cycle and sustainability analysis

HBN 00-10
COMPLIANT SOLUTIONS

Sika guarantees and future maintenance plans give extra security for healthcare facilities. Follow-up support and all of the necessary technical expertise and resources are available to protect our customers and their clients worldwide.

TAILORED SOLUTIONS

FOR ALL YOUR HEALTHCARE NEEDS

Every part of the building envelope, from the roof and the external façade walls to the basement, can be vulnerable to water ingress, reduced indoor air quality and hygiene levels, however water will always remain the biggest risk to buildings. Therefore these facilities need a high performance “envelope” that provides secure and unyielding protection from the elements.

Sika produces a wide range of quality products and systems that can waterproof and protect, seal, bond, strengthen, reinforce, and when necessary, repair every part of the building envelope. Sika building envelope technologies simultaneously promote functionality, enhance the appearance, and extend the service life of buildings.

“Sika understands the specific requirements of health-care facilities and can offer tailored solutions and expertise for all areas, ensuring a comfortable and hygienic environment for both patients and staff.”

As an innovative pioneer,

Sika thinks ahead and is committed to a better environment with a sustainable and integrated product approach.

Our products and system solutions contribute very positively to the sustainability of your health-care facility. Being aware that environmental impact occurs at each stage of a product life-cycle, Sika uses a Life Cycle Assessment (LCA) method according to ISO 14040 and European Standard EN15804, to provide a quantitative evaluation of the potential environmental impact of our products over their whole life cycle. Sika works to develop solutions for:

- Energy-efficiency
- Climate protection
- Material-efficiency
- Water-efficiency

All of these can contribute very significantly towards our product and your project's sustainability.

SUSTAINABLE SOLUTIONS

Dedicated to sustainable development, Sika remains committed to pioneering sustainable solutions and achieving this with the lowest impact on resources. As more and more designers and specifiers are demanding flooring with the highest Green Guide ratings, the A+ rating for Sikafloor® PS23 and PS24 will help design teams achieve the highest BREEAM score possible for all project types, minimising the environmental impact of any building.

Sika has always been a pioneer in supplying solutions to meet the highest environmental standards and participates in green building certification programs, such as LEED, BREEAM and DGNB. Sika is committed to genuinely sustainable building and civil engineering structures and so is also a member of the World Business Council for Sustainable Development (WBCSD), the United Nations Environment Programme (UNEP), Sustainable Building Initiative (SBCI), and Responsible Care.

**WHEN FLOORS PERFORM AS
EFFECTIVELY AS THE STAFF**

FLOORING

Creative design is essential when delivering a comfortable environment that must also cope with heavy foot traffic, be easy to care for and clean, but still enables you to maximize your aesthetics and design choices.

In a modern healthcare facility, the need to have functionality and also an environment where people feel safe and secure, in order to encourage healing and recovery, is essential.

Sika has developed a complete range of flooring and wall coating systems that meet performance, durability and aesthetic requirements for all areas within a modern healthcare facility.

Sika floor systems have no welded joints and are fully seamless to eliminate any bacteria breeding sites, plus they are odour free during application and in service. Sika floor-wall systems and sealants are certified for health-care facilities and fulfil the most stringent hygiene and bacteriostatic requirements. Many are Cleanroom Suitable Materials (CSM), tested to the highest International Standards of ISO 14644: Cleanrooms and Associated Controlled Environments: Classification of Air Cleanliness.

Sikafloor® flooring and Sikagard® wall coating systems offer seamless solutions available in a range of colours, surface finishes and textures, which can be tailored to the area in which they are applied, offering designers the ability to be creative and yet practical. The compatibility of Sika's range facilitates the creation of an attractive, pleasant and welcoming interior.

**WHEN SEALANTS ALLOW
FAÇADES TO WORK**

SEALING & BONDING

FAÇADES, FENESTRATION AND INSULATING GLASS

Sika has a fantastic range of high performance structural adhesive systems for glazed and panel façades.

Sika can provide structural joint calculations, colour samples, NBS and standard details, registered contractor schemes, site visits, adhesion compatibility testing, in-house or on-site training, technical support and third party accreditation.

Structural adhesives are used for glazed and ventilated façades, rainscreen cladding, membrane joints, balconies and balustrade bonding, laminar bonding of spandrel panels, and window bonding.

Solutions include: secret fixation method for rainscreen cladding, to replace unattractive visible fixings or costly mechanical secret fixing, structural silicones for glazing, allowing an enormous saving impact on material consumption by the use of slimmer frames, creating a more transparent façade, prevention of unwanted water vapour with Sika's membrane and bomb blast resistance.

JOINT SEALING

Sika provides cost-effective, high performance solutions for all your sealing and weather seal requirements.

Our extensive range of sealants meets the latest CE requirements, and offers solutions for a wide range of applications and substrates, including concrete and composite panels, stone, brickwork, and metal.

Solutions include: elastic sealants for expansion joints and perimeter seals, weather sealants for façades, including natural stone, fire rated and acoustic sealants, ideal when specific ratings are required, sanitary, anti-bacterial and hygienic sealants, anti-pick solutions, and general elastic adhesives.

HEALTHY ROOFS
HEALTHY STRUCTURES

ROOFING

A long-lasting watertight roof is essential for the reliable operation and sustainability of a building. Sika produces high quality and long-lasting solutions including the market leading ranges.

Sika® Sarnafil®, Sika-Trocal®, and Sika® Liquid Plastics Decothane® range of membranes meet all the specific needs and budget requirements of healthcare facilities.

Sika offers systems for a range of applications including exposed roofs, helipads, congested roof areas, conventional gravel ballasted roofing systems, green roofs, solar roofs, balconies, and flat roofs. Where healthcare facilities are being extended, Sika offers solutions ideal for refurbishing the life of existing healthcare facility roofs, with appropriate systems. This is often much more economical than completely re-roofing or effectively re-building.

Compared to traditional bitumen re-roofing, Sika's full range of mechanically fastened or adhered single ply membranes and Sika® Liquid Plastics range of liquid membrane systems have many potential advantages, including longer life-expectancy, flame-free application, energy-smart light coloured reflective membranes, lower additional loadings, and considerably higher flexibility and elasticity, particularly at low temperatures. Sika roof refurbishment solutions are therefore provided with comprehensive guarantees for years of increased service life. Sika offers expert advice in selecting the most appropriate roof refurbishment system, including specific project surveys and assessments.

**WHEN STRUCTURES STAY
WATERTIGHT FOR GOOD**

WATERPROOFING

Belowground areas are frequently used for essential service functions such as parking garages, plant rooms, storage and laundry areas.

However, now that space is at such a premium, basements are being utilised as primary care and treatment areas, laboratories, offices and computer centres, and archive rooms in many new healthcare developments. The need to ensure the structure is totally watertight in these cases is imperative.

Belowground structures are constantly exposed to potential water ingress and rarely have an opportunity to fully dry out. Penetrations through basement floors and walls, and any movement, construction or connection joints, can all provide an easy path for water infiltration. Leaks can also arise following defects, errors, or damage in construction.

The managed supervision and construction of watertight basements, and other belowground structures, is critical for durable, long term service and function, as is the selection of the most appropriate water-proofing concept and system.

Sika can provide expert advice, and support your watertight construction project from the earliest stages in the design, throughout site construction and quality control, to final completion and acceptance on site. Sika offers complete solutions for the successful waterproofing and protection of basements and belowground structures, including the innovative SikaProof® fully bonded sheet membrane system, the Sikaplan® membrane and waterbar system, rigid waterproofing systems consisting of Sika® Watertight Concrete using Sika admixtures, Sikalastic®-PU/PUREA based liquid applied membrane systems, and Sika Igoflex® and Sika® Bituseal bitumen based coatings and membranes.
